## Talk about it:

- Vaginal Burning/Itching
- Painful Intercourse
- Chronic Vaginal Infections
- Decreased Laxity
- Urinary Incontinence
- Stress/Urge Incontinence
- Chronic UTI's

MonaLisa Touch

# Vaginal dryness, itching, burning or urinary disorders?

Now there's something you can do about it that really works.

When estrogen levels decline, many changes occur. Millions of women experience symptoms such as vaginal dryness, itching, burning, or painful intercourse as a consequence of these changes. Many women suffer silently, and those who seek treatment find their options limited to estrogen therapy, which isn't for everyone.

**Now there's a better way.**

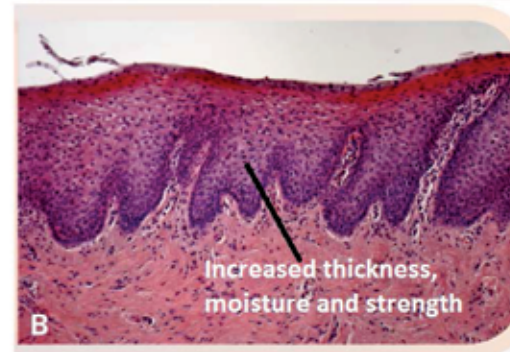

MonaLisa Touch

## Why Choose the MonaLisa Touch?

MonaLisa Touch laser treatment is a simple procedure that takes less than 5 minutes.

It delivers both immediate and lasting relief. And it's clinically proven to work.

- In-office, no anesthesia
- Simple, painless laser energy
- No side effects
- No downtime
- Thousands of women successfully treated since 2012
- Lower cost than alternatives

### Histological Comparison

A - Untreated

B - 1 month post 1 treatment

## A new procedure that patients have called "life-changing"

MonaLisa Touch delivers gentle laser energy to the vaginal tissue wall that stimulates a healing response and enhanced moisture levels in the vaginal canal. A typical course of treatment is three procedures over 12 weeks.

Many women report symptom relief after the very first treatment and even greater improvement after treatments 2 and 3.

## Q & A

**Q:** What happens during treatment?

**A:** The procedure will seem similar to your annual exam, and will likely be even quicker. Your healthcare provider will insert the laser into your vagina and deliver laser energy "pulses." The total procedure time is less than 5 minutes.

**Q:** Does it hurt?

**A:** The laser energy itself is virtually painless. Some patients report mild discomfort with the laser tip insertion during the first procedure due to vaginal dryness.

**Q:** How many treatments are required?

**A:** To obtain optimal results we recommend 3 Treatments each 6 weeks apart.

**Q:** How soon can I expect results?

**A:** Many patients have reported that they experience relief right away. Virtually all patients have experienced relief by the second treatment, or week 6.

**Q:** How long does treatment last?

**A:** MonaLisa Touch provides lasting results. A once-a-year single treatment is recommended to maintain symptom relief.
